QodeYard

UI/UX Designer / Sr. UI/UX Designer

Description
We're looking for someone who can take direction from written or spoken ideas and convert them seamlessly into interactive layouts. We aim to delight users with a simple and functional design. If you're a strong creative thinker, constantly curious, and can't stand users having anything less than a stellar experience, we want to hear from you!

You need to have:

- An outstanding portfolio, showcasing a foundation in interaction, visual design, color theory, typography, and ideation
- Experience designing digital products and systems, not just websites. You have helped build products.
- Hands-on experience with design software like Sketch, Illustrator, Photoshop, Corel Draw, etc.
